Applicable to students in FTEC Major:

1) Students should refer to the relevant Study Schemes and Recommended Course Patterns available at CUSIS and consult the Programme Director or your academic advisor on course selection.

2) Students resuming study after exchange and students transferring to the FTEC major from other majors are strongly advised to submit your credit transfer/course exemption applications, if any, AS EARLY AS POSSIBLE so as to better facilitate your course selection plan in your remaining study period.

3) ENGG1110 Introduction to Engineering Design and FINA2310 Fundamentals of Business Finance are pre-assigned to the FTEC Year 1 students or Year 2 or above students who have not fulfilled the course requirements in 2018-19 or before.

4) FTEC Year 2 students or Year 3 students who have not fulfilled the CSC11130 course requirement in 2018-19 or before are recommended to take CSC11130B Introduction to Computing Using JAVA which is offered exclusively for FTEC students.

5) ENGG2440B Discrete Mathematics for Engineers, FTEC2602 Financial Technology Practicum and SEEM2520B Fundamentals in Financial Engineering are pre-assigned to the FTEC Year 2 students or Year 3 students who have not fulfilled the course requirements in 2018-19 or before.

6) Year 3 students may take CSC14130 Introduction to Cyber Security which is a required course for the FTEC Major.

7) Students may consult your academic advisor for selection of research postgraduate courses. Applications are made during the course add/drop period by submitting the course add/drop form for postgraduate course. The form is available at the RES website.

Applicable to students in SEEM Major:

1) Students should refer to the relevant Study Schemes and Recommended Course Patterns available at CUSIS and consult your academic advisor on course selection.

2) Students resuming study after exchange and students transferring to the SEEM major from other majors are strongly advised to submit your credit transfer/course exemption applications, if any, AS EARLY AS POSSIBLE so as to better facilitate your course selection plan in your remaining study period.

3) SEEM Year 2 students or Year 3 or above students who have not fulfilled the CSC12040 course requirement in 2018-19 or before are recommended to take CSC12040B Introduction to Python which is offered exclusively for SEEM Students.

4) ENGG2440B Discrete Mathematics for Engineers and SEEM2602 Systems Engineering Practicum are pre-assigned to SEEM Year 2 students or Year 3 or above students who have not fulfilled the course requirements in 2018-19 or before.

5) The Final Year Project courses (SEEM4998 and SEEM4999) are pre-assigned to the concerned graduating students by the Department.

6) ENGG2601 Technology, Society and Engineering Practices and ENGG2602 Engineering Practicum were the Faculty Package requirements for students admitted to CUHK 2016-17 and before. The courses are not offered. Concerned students who have not fulfilled the requirements for graduation are required to complete and apply for the following course substitutions. The course substitution forms are available at the RES website.

<table>
<thead>
<tr>
<th>Phased out course</th>
<th>Substitution</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGG2601 Technology, Society and Engineering</td>
<td>CSC12040 Introduction to Python</td>
</tr>
<tr>
<td>ENGG2602 Engineering Practicum</td>
<td>SEEM2602 Systems Engineering Practicum</td>
</tr>
</tbody>
</table>

7) SEEM4480 is recognized to fulfill the BIS, FE, LSCM and SEM stream requirements for the students in all intakes.

8) A course of enrollment below 10 may be cancelled.

9) Students may consult your academic advisor for selection of research postgraduate courses. Applications are made during the course add/drop period by submitting the course add/drop form for postgraduate course. The form is available at the RES website.

For students having problems with course enrollment please contact dept@se.cuhk.edu.hk.
